GLOSSARY

(a) Simultaneous listeners refers to the maximum number of people who can listen to your broadcast at any one moment. There is no limit on the number of people who can listen over the course of a day, week, month, etc.
 (b) On-Demand Audio lets you upload tracks that can be accessed by listeners on a click-to-listen basis, using standard CD-style controls. On-Demand Audio requires a separate station (with a separate member name and password) from any other broadcast that you purchase. There are no limits on the number of tracks that can be uploaded.
